Monocrystalline Photovoltaic Modules 230-250Wp (60 cells)

Characteristics

▪ Modules Quality

BlueSun® Solar Energy modules are mounting in Portugal and ensure the highest system efficiency and the quality of our modules.

▪ Highest efficiency and performance

The panel's reduced voltage-temperature coefficient, anti-reflective glass and exceptional low-light performance attributes provide outstanding energy delivery per peak power watt.

▪ Guaranteed power output

Positive Tolerance + 3% ensure reliable energy production.

▪ Module can bear snow loads up to 5600 Pa and wind loads up to 3800 Pa

▪ High performance under low light conditions (Cloudy days, mornings and evenings)

▪ High Transmission Glass

Anti-reflective coated glass delivers up to 4% more energy than standard glass.

▪ Enhanced cell protection

Better cell protection thanks to robust frame and durable materials.

▪ Reliable and Robust Design

Proven materials, tempered front glass, and a sturdy anodized frame allow panel to operate reliably in multiple mounting configurations.

▪ TUV "Power controlled"

With the new TUV Rheinland test "Power controlled" it is guaranteed that the performance indicated for a BlueSun® solar panel is being met and that it is regularly monitored by the independent test service provider, TUV Rheinland.

Warranties and Certifications

- Warranties: 25 year limited power warranty
10 year limited product warranty

- Certifications:
IEC 61215, IEC 61730-1, IEC 61730-2, IEC 61730-3, EN 61000-6-1:2007, EN 61000-6-3:2007, IEC 5600 Pa.
